

X-COLLAR

The X-COLLAR offers the same functionality as the X-SCARF. It is more flat and has less profile and can easily be worn by uniformed personal. It offers protection against dangerous items in the neck and throat area.

Because of Velcro in the back the size is adjustable. This also is a safety feature to ensure the user cannot be choked by its own scarf.

When putting it on or off, the scarf can easily be opened and therefore it doesn't need to be pulled over the head. This is extremely helpful for users of goggles, helmets, earpieces or microphones.

Weight of collar: approx. 75g

Weight of ballistic insert: approx. 50g

The following ballistic packages are available:

Model 220

Model 320

Model F-355
