

PACKAGE X-COLLAR and X-SCARF

Model 220

Extremely thin, extremely light, best option for deep cover and extremely covert use. One of the lightest ballistic protection solutions on the market.

Ballistic protection: VPAM 2

Model 320

Heightened protection against handgun caliber bullets, while staying very thin, extremely light, still good for covert use. Very good solution for most cases.

Ballistic protection: VPAM 3

Model F-355

This package offers protection against fragmentation.

Fragmentation protection: According to STANAG 2920, 520 m/s
