

X-TECH UE – Standard/Plate Overt vest

Model Standard

The X-TECH UE-Standard has the same exact cut and comfort as the X-TECH DC under garment vest, but is designed as our over garment vest to be worn on top of our clothes.

The shape and cut offers good protection of all relevant body regions while maintaining a high comfort. The X-TECH UE-Standard can be ordered in standard colors, high visibility colors uniform design, or as a fashion vest under a suit. Thus the customer can choose the overall look between high visibility or maximum covertness.

Model Plate

The X-TECH UE-Plate same comfort and cut as the standard model. In addition to the X-TECH UE-Standard hot ballistic plates can be inserted to protect from additional rifles threats.

Depending on the colors and design being used, the protection can be communicated openly, or the vest can be designed in a way to achieve a more covert image.

The design primarily tactically oriented, but just like the X-TECH UE-Standard can be ordered in standard colors, high visibility colors uniform design, or as a fashion vest under a suit, to resemble the look of uniforms, workwear or fashion.

Different colors and fabrics are available for the covert which can also be fitted with hook and loop elements, MOLLE or different pockets.

The following ballistic packages are available:

Model 220	Model 220c	Model 320
