

X-TIVE – Ballistic T-Shirt

The X-TIVE is probably the lightest and most comfortable armored undershirt worldwide. It offers protection against handgun caliber bullets while weighing less than 500g total.

Persons at risk with or without personal protective detail first and foremost have to be able to left there everyday life without being distracted. A typical armored vest cannot do this because they are mostly too thick too heavy and not flexible enough. Because of this we developed this extremely light and covert T-Shirt and adjusted the ballistic protection towards real threats. To achieve a very comfortable feel, the ballistic package is integrated in an extremely light and breathable functional fabric. This leads to excellent comfort and fit. This protective system can be worn for extended periods of times even while doing sports and leisure activities. The X-TIVES's thickness is just a little over 2mm in it's lightest version.

Such function in an extremely light and comfortable package is unparalleled. For the development of the shirt we analyzed 850 assassination attempts worldwide, regarding time of day, location, target zones and lethality. That led to special comfortable and secure shape and fit. The X-TIVE T-Shirt can be worn for extremely covert protection by agents, VIP, authorities.

To achieve best protection according to threat levels, different protection packages can be chosen. By quickly and easily changing the protective package the shirt can be adapted towards the actual threat and situation easily.

The following ballistic packages are available:
